

Client Pending Requests Follow-Up and Closure Procedure

1. Introduction:

This protocol defines the process for managing requests marked as "Pending with Client" on the DIB system, where additional information or documents are required from the client to proceed.

2. Objectives:

- Ensure timely follow-up on pending client requests.
- Reduce delays caused by incomplete client requirements.
- Improve operational efficiency and request turnaround time.
- Standardize client communication across all follow-up stages.
- Minimize request backlog and prevent prolonged pending cases.

3. Scope:

This protocol applies to all post-sale service requests, including but not limited to:

- Policy updates (additions, deletions, amendments).
- Claims.
- Medical approvals.

4. Procedure:

A request is marked as "Pending with Client" when required documents or information are not provided by the client.

Once the status is assigned, the follow-up timeline will be triggered automatically as per the defined matrix below.

5. Client Pending Requests Follow-up & Closure Timeline

Follow-Up & Closure Matrix

6. Roles & Responsibilities:

6.1 Operations Team:

- Ensure the request is correctly marked as “*Pending with Client*” once requirements are missing.
- Verify that required documents/requirements are clearly communicated to the client in the system.
- Monitor requests approaching closure and ensure no pending client response has been overlooked.
- Escalate critical or high-value requests when necessary.

6.2 Clients Relations Team:

- Review assigned requests marked as Pending with Client.
- Contact the client on Day 5 (or earlier if needed) to follow up on missing requirements.
- Clarify required documents and remove any ambiguity for the client.
- Identify reasons for delay and support the client in completing requirements.
- Confirm expected submission timeline with the client when possible.
- Document all communication (calls, emails, feedback) in the system.
- Update request status or add notes to reflect latest client interaction.

6.3 IT Team (DIB System):

- Automatically trigger client notifications based on the defined timeline (Day 0, 1, 2, 3, 4,5).
- Track request aging from the moment it is marked as Pending with Client.
- Generate alerts for upcoming actions (e.g., Day 4 CRO follow-up, Day 5 final notice).
- Support escalation rules (e.g., notifying client manager if applicable).
- Execute automatic closure of requests on Day 5 if requirements are not received.
- Maintain full audit trail of all notifications and status changes.
