1. Product Overview

Dawri (Arabic: دوري, meaning “My League”) is a dual-sided SaaS platform that enables organizations and individual gamers across Saudi Arabia, the Gulf Cooperation Council (GCC), and the broader Middle East and North Africa (MENA) region to create, manage, and participate in structured esports tournaments. The platform serves two distinct market segments simultaneously: a B2B channel targeting corporations, universities,

and government entities seeking employee or student engagement tools, and a B2C channel targeting individual gamers seeking competitive community play.

Dawri integrates automated tournament bracket management, real-time match tracking, a digital goods marketplace (gaming cards, subscriptions, in-game currency), White Label capabilities for enterprise clients, and HR system integrations — all delivered through a fully Arabic-first, RTL-native web application with a subsequent mobile application roadmap.

The platform is designed to capitalize on Saudi Arabia's Vision 2030 investments in the gaming and esports sector, a market in which the Kingdom has committed over \$38 billion in gaming-related initiatives and hosts the world's largest esports prize pool events through GAMERS8 and the Esports World Cup.

2. Problem Statement

2.1 The Corporate Engagement Gap

Organizations across the GCC invest heavily in traditional team-building activities — offsite retreats, sports days, and corporate events — yet these activities consistently suffer from low voluntary participation, high per-head costs, and limited measurability. Meanwhile, over 67% of employees in Saudi Arabia aged 18–35 identify as active gamers, yet no structured platform exists to channel this shared interest into a measurable, recurring employee engagement mechanism.

Human Resources departments lack the tools to organize, track, and report on gaming-based engagement initiatives in a way that integrates with existing HR infrastructure (SAP, Oracle HCM, Workday). The result is that gaming remains an informal, unstructured activity with no business value attribution.

2.2 The Individual Gamer Fragmentation Problem

Individual gamers in the MENA region — estimated at over 23 million in Saudi Arabia alone — have no unified Arabic-language platform to discover, join, and compete in structured tournaments for popular titles such as EA FC 25, PUBG Mobile, and Call of Duty Mobile. Existing global platforms (Challengermode, Battlefy, Toornament) are

English-only, culturally misaligned, and do not support the regional payment infrastructure or digital goods ecosystem (e.g., PUBG UC top-ups, STC Pay, Mada).

2.3 The Digital Goods Distribution Inefficiency

Gamers in the region routinely purchase digital goods (PlayStation Network cards, Apple App Store credit, PUBG UC, in-game currency) through fragmented, often unofficial channels. There is no trusted, integrated platform that combines tournament participation with a legitimate digital goods marketplace, creating a missed opportunity for a high-frequency, high-loyalty revenue stream.

3. Target Users and Personas

3.1 B2B Personas

Persona 1: The HR Director (Primary B2B Decision Maker)

Attribute	Detail
Name	Noura Al-Rashidi
Role	HR Director, mid-to-large enterprise (500–5,000 employees)
Age	38–52
Location	Riyadh, Jeddah, or Dubai
Pain Points	Low employee engagement scores, high turnover among Gen Z/Millennial employees, difficulty justifying team-building spend with measurable ROI
Goals	Improve eNPS scores, reduce voluntary attrition, demonstrate HR innovation to C-suite
Tech Comfort	Moderate; uses SAP SuccessFactors or Oracle HCM daily
Decision Trigger	Peer recommendation, case study with measurable engagement uplift data

Persona 2: The IT/Procurement Manager (Technical Gatekeeper)

Attribute	Detail
Name	Khalid Al-Otaibi
Role	IT Manager or Procurement Lead
Age	30–45
Pain Points	Security compliance concerns, integration complexity, vendor lock-in
Goals	Ensure platform meets PDPL, ISO 27001, and internal security policies
Decision Trigger	SOC 2 report, penetration test results, SSO/SAML support

Persona 3: The University Student Affairs Director (Education Segment)

Attribute	Detail
Name	Dr. Ahmed Al-Zahrani
Role	Student Affairs or Extracurricular Activities Director
Age	40–55
Pain Points	Declining student engagement in non-academic activities, difficulty organizing large-scale student events
Goals	Increase student participation metrics, align with Vision 2030 youth engagement mandates
Decision Trigger	Ministry of Education endorsement, peer university adoption

3.2 B2C Personas

Persona 4: The Competitive Casual Gamer (Core B2C User)

Attribute	Detail
Name	Faisal Al-Ghamdi
Age	19–28
Location	Saudi Arabia (Riyadh, Jeddah, Dammam)
Games Played	EA FC 25, PUBG Mobile, Call of Duty Mobile
Platform	Mobile-first, plays 2–4 hours daily
Pain Points	No Arabic platform to find fair, organized tournaments; distrust of foreign platforms for payments
Goals	Compete, rank up, win digital goods, build a gaming reputation
Spending Behavior	Spends 150–400 SAR/month on in-game purchases

Persona 5: The Corporate Employee Gamer (Crossover User)

Attribute	Detail
Name	Sara Al-Dosari
Age	24–32
Role	Software Engineer or Marketing Analyst at a tech company
Motivation	Participates in company tournaments through Dawri B2B, then continues using the platform independently for B2C tournaments
Value to Platform	Organic B2B-to-B2C conversion funnel

4. Key Value Proposition

4.1 For Enterprises (B2B)

Dawri transforms esports from an informal employee pastime into a **structured, measurable, and HR-integrated engagement program**. Unlike generic team-building tools, Dawri delivers:

- **Quantifiable engagement data** exportable to HR dashboards (participation rates, department-level activity, retention correlation)
- **Zero operational overhead** — fully automated tournament management eliminates the need for dedicated event coordinators
- **White Label capability** — enterprises deploy Dawri under their own brand identity, reinforcing internal culture
- **HR system integration** — native connectors for SAP SuccessFactors, Oracle HCM, and Workday ensure employee data synchronization without manual administration

4.2 For Individual Gamers (B2C)

Dawri is the **first Arabic-native, culturally aligned competitive gaming platform** for the MENA region, offering:

- **Arabic-first UX** with full RTL support and localized content
 - **Trusted digital goods marketplace** — legitimate PSN, Apple, PUBG UC, and other card purchases within the same platform
 - **Fair, automated competition** — transparent bracket management with anti-cheat result verification
 - **Regional payment support** — Mada, STC Pay, Apple Pay, and credit cards
-

5. Core Features

5.1 Tournament Engine (MVP)

The tournament engine is the core of the Dawri platform. It supports the following bracket formats:

Format	Description	Supported Games
Single Elimination	Standard knockout bracket	All
Double Elimination	Losers bracket for second chance	All
Round Robin	All participants play each other	EA FC 25
Swiss System	Paired by performance, no elimination	All

Key capabilities:

- Automated bracket generation based on participant count and seeding rules
- Real-time bracket visualization accessible to all participants and spectators
- Configurable match scheduling with timezone support (AST/GST/EET)
- Optional human moderator assignment per tournament with override capabilities
- Match result submission via screenshot upload with AI-assisted validation
- Dispute resolution workflow with moderator escalation path

5.2 Supported Games at Launch (MVP)

Game	Platform	Result Verification Method
EA FC 25	PS5, Xbox Series X, PC	Screenshot + EA API (where available)
PUBG Mobile	iOS, Android	Screenshot + PUBG API
Call of Duty Mobile	iOS, Android	Screenshot + Activision API

5.3 Digital Goods Marketplace (MVP)

An integrated storefront powered by a third-party digital distribution API (Reloadly or WUPEX) offering:

- PlayStation Network (PSN) gift cards (50, 100, 200 SAR denominations)
- Apple App Store & iTunes gift cards
- PUBG Mobile UC top-ups
- Call of Duty Mobile CP
- Google Play gift cards
- STC gaming credit

Revenue model: 3–8% margin on each transaction. Marketplace purchases can be funded via wallet balance earned through tournament participation or direct payment.

5.4 White Label System (MVP)

Enterprise clients on the Professional or Enterprise subscription tier can activate White Label mode, which provides:

- Custom subdomain (`tournaments.companyname.com`)
- Logo and brand color replacement throughout the UI
- Custom email templates with company branding
- Removal of Dawri branding from player-facing interfaces
- Dedicated onboarding support

5.5 HR System Integration (MVP)

Integration	Protocol	Data Synced
SAP SuccessFactors	REST API / OData	Employee roster, department hierarchy
Oracle HCM Cloud	REST API	Employee roster, org units
Workday	REST API (RAAS)	Employee roster, cost centers
Generic HRIS	CSV/SFTP import	Employee roster

Synced data is used exclusively for: (a) auto-provisioning employee accounts, (b) department-level reporting, and © engagement analytics. No HR data is stored beyond what is necessary for these functions.

5.6 Analytics and Reporting Dashboard

- Real-time participation metrics by department, team, and individual
- Tournament completion rates and engagement trends over time
- Exportable reports in PDF and CSV format
- HR-ready engagement score calculation (configurable weighting)
- Player leaderboards (company-wide and cross-company for B2C)

5.7 Authentication and Identity Verification

Dawri implements a multi-layered authentication system designed for the GCC market, where mobile-first identity verification is the expected standard:

Method	Use Case	When Required
Email / Password	Primary login credential	All users
Google / Apple Social Login	One-click registration and login	All users (optional)
SMS OTP — Phone Verification	Mandatory at registration to activate account	All users
SMS OTP — MFA at Login	Second factor after password	Mandatory for Admins; optional for Players
SMS OTP — Account Recovery	Recover access when email is unavailable	All users with verified phone
TOTP (Authenticator App)	Alternative MFA method	All users (optional)
SAML 2.0 / OIDC SSO	Enterprise single sign-on	B2B tenants (Professional/Enterprise tier)

SMS OTP is delivered via Unifonic (primary) and Taqnyat (fallback), both Saudi-based providers supporting all GCC and MENA mobile numbers. OTP codes are 6 digits, expire in 5 minutes, and are rate-limited to prevent abuse.

5.8 Notification and Communication System

- In-app notifications (web push)
 - Email notifications (match reminders, results, bracket updates)
 - **SMS notifications for: account verification OTP, login MFA OTP, account recovery OTP, match reminders (2 hours before), and dispute escalation alerts** (via Unifonic / Taqnyat)
 - Optional Microsoft Teams and Slack integration for B2B clients
-

6. User Journeys

6.1 B2B Journey: HR Director Onboarding a Company Tournament

1. HR Director signs up for Dawri Business account
2. Selects subscription plan (Starter / Professional / Enterprise)
3. Activates HR integration (SAP/Oracle/Workday) or uploads CSV
4. Employee accounts auto-provisioned; employees receive invitation email
5. HR Director creates tournament: selects game, format, schedule, prizes
6. Tournament published; employees register via company portal or Dawri app
7. Automated bracket generated at registration deadline
8. Matches played; results submitted by participants
9. AI validates results; disputes escalated to assigned moderator
10. Tournament concludes; winners announced; digital goods prizes distributed
11. HR Director accesses engagement report; exports to HR dashboard
12. Report shared with C-suite; ROI demonstrated

6.2 B2C Journey: Individual Gamer Joining a Public Tournament

1. Gamer discovers Dawri via social media or app store
2. Registers with email/password or social login (Google/Apple)
3. Enters mobile number; receives SMS OTP (6-digit code via Unifonic/Taqnyat)
4. Verifies OTP to activate account – phone number is permanently linked to the account
5. Completes gaming profile: links game accounts, sets preferred games
6. Browses public tournament listings; filters by game, format, entry fee
7. Registers for free or paid tournament
8. Receives match schedule notification via SMS and in-app
9. Plays match; submits result with screenshot
10. Advances through bracket or exits with ranking points
11. Purchases PUBG UC from marketplace using wallet or card
12. Builds ranking; qualifies for featured tournaments

6.3 B2C Journey: Digital Goods Purchase

1. Player navigates to Marketplace tab
 2. Selects product category (PSN, Apple, PUBG UC, etc.)
 3. Selects denomination
 4. Chooses payment method (Wallet balance / Mada / STC Pay / Credit Card)
 5. Completes payment; receives digital code instantly via email and in-app
 6. Code redeemed on respective platform
-

7. User Stories

7.1 Tournament Management

ID	As a...	I want to...	So that...
US-001	HR Director	Create a company-wide FIFA tournament in under 10 minutes	I can run engagement programs without technical expertise
US-002	HR Director	Assign a moderator to oversee a tournament	Disputes are handled by a designated person
US-003	Tournament Moderator	Override a match result submitted by a player	Incorrect results do not affect bracket integrity
US-004	Player	View my upcoming match schedule with opponent details	I can prepare and show up on time
US-005	Player	Submit my match result with a screenshot	My win is recorded without needing a moderator
US-006	Player	Dispute an incorrect result submitted by my opponent	Fair play is maintained
US-007	System Admin	Configure anti-cheat rules per game	Platform integrity is preserved

7.2 Digital Goods Marketplace

ID	As a...	I want to...	So that...
US-008	Player	Purchase a PSN card within the Dawri app	I don't need to leave the platform to buy gaming credit
US-009	Player	Use my tournament prize wallet to buy digital goods	My winnings have immediate practical value
US-010	Enterprise Client	Bulk-purchase digital goods as tournament prizes	I can automate prize distribution

7.3 HR Integration and Reporting

ID	As a...	I want to...	So that...
US-011	HR Director	Sync employee data from SAP SuccessFactors automatically	I don't manually manage user accounts
US-012	HR Director	View a department-level engagement report	I can identify which teams are most active
US-013	HR Director	Export engagement data as a PDF report	I can present results to leadership
US-014	CHRO	See a correlation between tournament participation and retention	I can justify the investment in Dawri

7.4 White Label

ID	As a...	I want to...	So that...
US-015	Enterprise Client	Deploy Dawri under my company's brand	Employees see a branded experience, not a third-party tool
US-016	Enterprise Client	Set a custom subdomain for my company portal	The platform feels native to our digital ecosystem

8. Acceptance Criteria

AC-001: Tournament Creation (US-001)

- **Given** an authenticated HR Director on a paid plan
- **When** they complete the tournament creation form (name, game, format, dates, max participants)
- **Then** a tournament is created within 3 seconds, a unique join link is generated, and invited employees receive an email notification within 5 minutes

AC-002: Automated Bracket Generation

- **Given** a tournament has reached its registration deadline
- **When** the system triggers bracket generation
- **Then** a valid bracket is generated within 30 seconds for up to 512 participants, with no byes exceeding the minimum required for the format

AC-003: Result Submission with Screenshot

- **Given** a match has been played
- **When** a player submits a result with a screenshot
- **Then** the screenshot is stored, the result is marked “Pending Verification,” and the opponent is notified to confirm or dispute within 24 hours

AC-004: Digital Goods Purchase

- **Given** an authenticated user with sufficient wallet balance or a valid payment method
- **When** they complete a digital goods purchase
- **Then** the digital code is delivered to their registered email and in-app notification within 60 seconds of payment confirmation

AC-005: HR Data Sync (SAP SuccessFactors)

- **Given** an enterprise client has configured the SAP integration with valid credentials
- **When** the nightly sync job runs (or is triggered manually)
- **Then** all active employees are provisioned as Dawri accounts, terminated employees are deactivated, and the sync log is available in the admin dashboard within 15 minutes

AC-006: White Label Activation

- **Given** an enterprise client on the Professional or Enterprise plan
- **When** they upload their logo and configure brand colors

- **Then** all player-facing pages under their subdomain reflect the custom branding within 5 minutes, with no Dawri branding visible
-

9. KPIs and Success Metrics

9.1 Business KPIs (Year 1 Targets)

KPI	Target	Measurement Method
B2B Clients Acquired	100 companies	CRM records
B2C Registered Users	5,000 users	Database count
Monthly Recurring Revenue (MRR)	SAR 200,000 by Month 12	Billing system
Annual Recurring Revenue (ARR)	SAR 2,000,000 by end of Year 1	Billing system
Marketplace GMV	SAR 500,000 in Year 1	Transaction records
Net Revenue Retention (NRR)	$\geq 110\%$	Cohort analysis
Customer Acquisition Cost (CAC)	$\leq$ SAR 3,000 per B2B client	Marketing spend / new clients
Customer Lifetime Value (LTV)	$\geq$ SAR 30,000 per B2B client	Revenue model projection
LTV:CAC Ratio	$\geq 10:1$	Derived metric

9.2 Product KPIs

KPI	Target	Measurement Method
Tournament Completion Rate	$\geq 85\%$	Tournaments completed / started
Match Result Submission Rate	$\geq 90\%$	Results submitted / matches scheduled
Dispute Rate	$\leq 5\%$	Disputes raised / matches played
Time to Create Tournament	≤ 10 minutes (median)	Product analytics
Digital Goods Purchase Conversion	$\geq 15\%$ of active users/month	Funnel analytics
HR Integration Sync Success Rate	$\geq 99\%$	Integration monitoring

9.3 Engagement KPIs (B2B)

KPI	Target	Measurement Method
Employee Participation Rate per Tournament	$\geq 40\%$ of invited employees	Tournament analytics
Monthly Active Companies	$\geq 70\%$ of subscribed clients	Platform activity logs
Net Promoter Score (NPS) — B2B	≥ 50	Quarterly survey
Report Export Rate	$\geq 60\%$ of HR admins per quarter	Feature usage analytics

9.4 Technical KPIs

KPI	Target	Measurement Method
Platform Uptime	$\geq 99.9\%$	Uptime monitoring (Datadog/New Relic)
API Response Time (P95)	$\leq 300\text{ms}$	APM tooling
Bracket Generation Time	≤ 30 seconds for 512 participants	Performance testing
Digital Code Delivery Time	≤ 60 seconds	Transaction logs
Security Incidents	0 critical incidents	SIEM alerts

End of PRD — Document Version 1.0
